Ocumetics Completes Staff Training for First-In-Human Clinical Study of Accommodating Intraocular Lens

For Immediate Release

Calgary, Alberta – July 9, 2025 - Ocumetics Technology Corp. ("Ocumetics" or the "Company") (TSXV: OTC) (OTCQB: OTCFF) (FRA: 2QBO), a leader in advanced ophthalmic technology, is pleased to announce that it has completed training of the clinical team at its first study site in Mexico City. This training is in preparation for the upcoming first-in-human (FIH) clinical study of the Ocumetics accommodating intraocular lens (the "Ocumetics Lens").

Dean Burns, CEO of Ocumetics Technology Corp., emphasized the importance of this milestone, stating, "We are excited to announce the finalization of our site training protocol - a vital step in ensuring the successful launch of our first-in-human study. Meticulous training of surgeons and staff at the clinical study site is key to achievement of optimal outcomes and the highest standard of care."

This training marks a critical milestone in Ocumetics' 18-year journey toward regulatory approval of a transformative accommodating intraocular lens technology intended to restore vision for patients undergoing cataract extraction. The training program is designed to ensure that all participating staff members are equipped with the specialized skills and knowledge necessary to implant the Ocumetics Lens with precision and safety.

The Ocumetics Lens is designed to restore the ability to see both distant and near objects clearly without glasses following cataract surgery. The training program covers every phase of the clinical trial process, including pre-operative assessment, lens handling, surgical technique, and post-operative care. Using proven training methods, the curriculum ensures successful execution of the first clinical study of this novel technology.

With clinical team training completed, and ethics committee approval pending, Ocumetics is poised to launch its historic FIH trial—an essential step toward clinical validation and eventual regulatory approval to market the Ocumetics Lens.

About Ocumetics

Ocumetics Technology Corp. (TSXV: OTC) (OTCQB: OTCFF) (FRA: 2QBO) is a Canadian research and product development company that is dedicated to developing advanced vision correction solutions that enhance the quality of life for patients. Through innovative research and development, Ocumetics aims to transform the field of ophthalmology with state-of-the-art intraocular lenses and other vision-enhancing technologies.

Ocumetics is in the preclinical study phase of a game-changing technology for the ophthalmic industry. Ocumetics has developed an intraocular lens that fits within the natural lens compartment of the eye, potentially to eliminate the need for corrective lenses. It is designed to allow the eye's natural muscle activity to shift focus from distance to near, providing clear vision at all distances without the help of glasses or contact lenses.
